

## Steps for Connecting Laptop to a Projector

1. Connect the video cable (VGA/HDMI) from your laptop's external video port to the projector.

2. Open the lens shutter than press the "power" button on the projector to turn it ON.

3. If you need audio for your presentation, connect the laptop's "audio out" port to the external speakers.

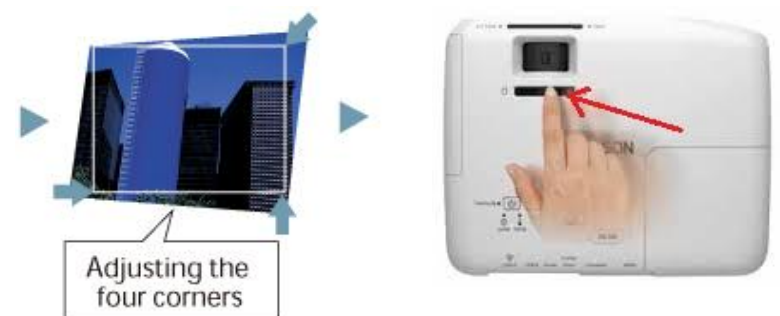

4. Sync the projector and laptop by holding down the FUNCTION key  and pressing one of the following keys to toggle:

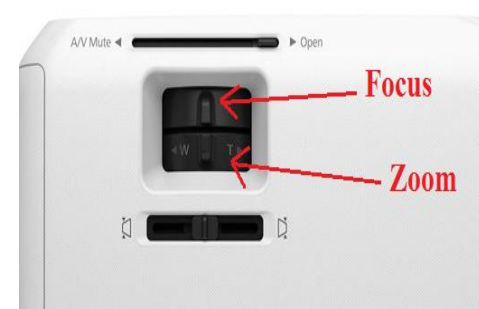

*(Note: Depending on your computer, you may have to use a different Function key those listed above.)*

5. You can adjust the tilted picture by moving the slider left or right on the top of the projector.

6. You can set the blurry picture using focus lever above the lens unit. Size adjustment should be done using the zoom lever on lens unit.

**Note:** Please power off the projector by pressing power key twice after completing your presentation. It is also recommended to off the projector while not using it more than 5 minutes in between your meeting. It will save the energy as well as working life hours of the projector lamp.
